

Digital Hydraulic Testers and Analogue Flow Indicators

DHM Series

DHT Series

SDM / SDMKR Series

Digital Hydraulic Testers DHM / DHT Series

WT portable hydraulic components are integrated to measure pressure, flow, temperature and speed. A portable range of testers will allow you to easily and safely simulate operating conditions using the built-in load valve to help pinpoint the fault. A safe and clean environment is maintained by including the unique *INTERPASS™ protection system. In the event of over-pressurisation, burst discs built into the load valve will safely bypass oil internally through the valve and back to the tank. NOT externally where it could contaminate the environment or physically injure a person.

Analogue Flow Indicators SDM / SDMKR Series

Analogue flow indicators for measuring the flow rate of fluids in mobile and industrial hydraulics.

The SDMKR is designed with a loading valve for the strain test of the hydraulic system to facilitate precise control of the operating pressure. In addition, this product can also be subjected to a reverse flow direction (without flow rate determination).

Item No.	Item Designation	Item Description	Qty	RRP	Special Net Price / pc
6100018002	WT-DHM-L00400-B0420-G16	Bluetooth™ Digital Hydraulic Tester 400 LPM	25	\$8,481.15	\$6,550.00
6100018006	WT-DHM-L00800-B0480-U24	Bluetooth™ Digital Hydraulic Tester 800 LPM	8	\$10,688.15	\$8,250.00
